## ASX ANNOUNCEMENT / MEDIA RELEASE

---

16 October 2009

### Appointment of Chief Financial Officer

- **Linc Energy is pleased to announce the appointment of Mr Anton Rohner as Chief Financial Officer**

Linc Energy Ltd (ASX: LNC) (OTCQX: LNCGY) is pleased to announce that Mr Anton Rohner has been appointed to the position of Chief Financial Officer of the Company and will commence in November 2009.

Mr Rohner brings over 19 years experience to the role; the most recent 10 years being in the energy industry, and prior to this in the Mining and Resources sector.

Anton joins Linc Energy from *Macquarie Bank*, where for the past 2 years he has held the position of Managing Director for Renewable Energy and Utilities and been responsible for securing developments in renewable energy and utilities through Asia and Africa.

Prior to this, Anton was the Managing Director of Asia for *Roaring 40s*, a partnership formed between *China Light & Power* and *Hydro Tasmania* to develop and operate sources of renewable energy. In this role Anton was responsible for all investments and activities in the Asia region as well as financing and operating responsibilities.

Mr Rohner also worked for *Hydro Tasmania* for a period of 6 years as their Group Manager Finance and Investment, and prior to this held various commercial and accounting roles in the mining sector. Mr Rohner is a full member of the Australian Institute of Company Directors, as well as a Certified Practising Accountant.

Linc Energy's Chief Executive Officer, Mr Peter Bond commented that "we are very pleased to have a professional of Anton's calibre join Linc Energy and I look forward to the strong contribution he will make to the business."

Mr Rohner replaces the former CFO, Mr Rob Stratford, who finished with the Company prior to the end of his probation period. The Company would like to thank Mr Stratford for his contribution and wishes him all the best in his future endeavours.

For further information please contact Mr Bond.

## Company Profile

Linc Energy is an innovative, forward-thinking company developing a significant energy business based on the production of cleaner energy solutions.

Linc Energy has successfully combined two known technologies, Underground Coal Gasification (UCG) and Gas to Liquids (GTL) and has demonstrated its vision of being a leading supplier of a new source of cleaner liquid transport fuels for the future.

UCG technology provides access to coal, deep underground and by in-situ gasification produces a high quality synthesis gas (syngas) containing carbon monoxide and hydrogen. Aboveground, in the GTL process, syngas is processed via Fischer-Tropsch technology to produce high quality, sulphur free synthetic hydrocarbons.

Linc Energy plans to combine its UCG and GTL technologies commercially at sites in Australia and around the globe as it realizes its vision of becoming the world's leader in providing cleaner synthetic diesel and jet fuels from stranded coal resources.

UCG produced syngas can also be used as a feedstock to generate gas turbine combined cycle power, resulting in reduced greenhouse gas emissions.

With significant coal deposits suitable for UCG technology, Linc Energy can provide alternative sources of liquid fuels and power generation well into the foreseeable future.

Linc Energy represents a new future for liquid fuels production and high efficiency energy generation.
