## Leading the way

Linc Energy is leading the way in Underground Coal Gasification (UCG) for cleaner power generation and fuel production.

At its Chinchilla Demonstration Facility in Queensland, Australia, Linc Energy has proven the combined use of UCG technology and Gas to Liquids (GTL) technology for cleaner energy solutions. Together, UCG and GTL can change today's energy climate.

Linc Energy intends to commercialise its UCG technology in South Australia first with power generation, followed by GTL for fuel production.

Linc Energy also has business interests in the Powder River and Williston Basins in the United States, as well as Vietnam and Uzbekistan.

## The demand for energy

The global demand for oil and resources continues to escalate as industry booms and populations grow. Countries such as Australia and the United States are reliant on imported oil for domestic energy needs. UCG can provide countries rich in coal with the means to produce energy sources within their own borders.

Coal suitable for UCG technology is deep underground, too costly to mine using traditional methods. UCG provides access to this coal while it is still in the ground. The UCG process produces a synthesis gas (syngas), which is primarily a mix of carbon monoxide and hydrogen. Syngas is an excellent feedstock for gas turbine combined cycle power generation, and transport fuels such as diesel and jet fuel produced using GTL technology.

## How to invest

Linc Energy is listed on securities exchanges in Australia and the United States.

- Australia: ASX : LNC
- United States: OTCQX : LNCGY

You can invest in Linc Energy by contacting your broker or financial advisor in Australia, or market maker in the United States. Please note that one American Depository Receipt (ADR) is equivalent to 10 Linc Energy shares.

## Fast facts

### Business name

Linc Energy Ltd (Australia)  
Linc Energy Operations, Inc  
(United States)

### Listings

Linc Energy listed on the Australian Securities Exchange in May 2006, and on the United States OTCQX in December 2007.

### Head offices

Linc Energy Ltd  
32 Edward Street  
Brisbane QLD 4000  
Phone: +617 3229 0800  
Fax: +617 3229 6800  
Email: [linc@lincenergy.com.au](mailto:linc@lincenergy.com.au)

Linc Energy Operations, Inc (US)  
1200 17th Street  
Suite 2100  
Denver CO 80202  
Phone: +11 303 623 0510  
Fax: +11 303 623 0547  
Email: [info@lincenergy.com.au](mailto:info@lincenergy.com.au)

### Key locations

Australia:  
Queensland: Chinchilla Demonstration Facility  
South Australia: Arckaringa and Walloway Basins

### United States:

Alaska: Cook Inlet Basin  
Wyoming, Montana, and North Dakota: Powder River and Williston Basins

### Uzbekistan (Eastern Europe):

Angren: Yerostigaz commercial UCG facility

Vietnam: Red River Delta region

## About Linc Energy

Linc Energy is an Australian energy company which listed on the Australian Securities Exchange (ASX) in May 2006 and the OTCQX in December 2007. Through the unique combination of Underground Coal Gasification (UCG) and conventional Fischer-Tropsch technology to produce Gas to Liquids (GTL), Linc Energy is developing a significant energy business based on the production of cleaner energy solutions for the future.
